Art Unit: 3739

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-28 and 33, drawn to a probe apparatus, classified in class 606, subclass 041.
- II. Claims 29-32, drawn to a method for forming a lesion in a body orifice, classified in class 128, subclass 898.
- III. Claims 34 and 35, drawn to a method of coagulating tumor tissue, classified in class 128, subclass 898.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and III and invention I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus may be used to perform various different processes, such as the two distinct processes as set forth in Groups II and III. The apparatus may be used for a further different process such as treatment of uterine tissue.. Each of the processes of Groups II and III are deemed to be independent and distinct.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was made to Craig Slavin on May 13, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Peffley whose telephone number is (703) 308-4305. The examiner can normally be reached on Mon-Fri from 6am-3pm.
